

Sourabh Kumar Ravi

Full-Stack Software Engineer | Generative AI, React.js, Node.js | 4+ Years

sourabh.k.ravi@gmail.com | +91-7250465621 | Portfolio: chitua.site | linkedin.com/in/sourabh-k-ravi | github.com/SourabhRavi

EXPERIENCE

IBM | APPLICATION DEVELOPER

Pune, India | Mar 2025 – Jul 2026

- Delivered production **React.js, Angular, and TypeScript** features for Barclays' Risk & Finance Treasury platform in Agile sprints, collaborating with cross-functional teams (product, QA, backend) to gather and analyze requirements for critical credit-risk workflows.
- Applied **Generative AI** and agentic coding tools to analyze large legacy codebases, trace dependencies, break down requirements into implementation plans, and scaffold **scalable, maintainable** features.
- Used **prompt engineering** with LLM-based tools to debug defects, refactor legacy modules, and generate unit tests, with human-led review for code quality, security, and maintainability.
- Implemented complex frontend workflows across **UI components, application logic, API-integrated user flows, and legacy modules**.

MOBIUX LABS | SOFTWARE ENGINEER

Bengaluru, India | Aug 2023 – Jan 2025

- Led development of a **React.js** ticketing platform serving **15,000+ users**, owning frontend feature delivery across production workflows and contributing to a **35% increase in sales**.
- Used **Generative AI** code-generation and agentic workflows to translate requirements into implementation plans, generate and refine code, debug issues, and refactor production modules.
- Built and maintained **reusable React components** and application workflows, integrating frontend features with backend services and optimizing rendering for **scalable, high-performance** user experiences.
- Introduced **CodeRabbit** AI-powered code reviews and led internal training on **Generative AI-assisted development**, improving code quality and AI adoption across the team.

PETPOOJA | SOFTWARE DEVELOPER

Ahmedabad, India | Aug 2022 – Nov 2022

- Optimized a production **React.js** application, improving performance by **20%** through rendering optimizations and more efficient bundle imports.
- Diagnosed and resolved high-priority production issues through **root-cause analysis and frontend debugging**, improving application stability and reliability.

DEVX | WEBSITE DEVELOPER

Ahmedabad, India | Jun 2021 – Jun 2022

- Rebuilt and optimized a production **React.js** coworking platform, improving application performance by **35%** through frontend and rendering optimizations.
- Improved web performance and delivery efficiency, achieving **Google PageSpeed scores above 90** across the application.

PROJECTS

SKIM - GENAI RAG APPLICATION

REACT, TYPESCRIPT, NODE.JS, EXPRESS, GEMINI, QDRANT, MONGODB, LLM

GitHub: github.com/SourabhRavi/rag-pdf-chat | Live: skim.chitua.site

- Built a full-stack **Generative AI** application that lets users chat with uploaded PDFs, using a **Retrieval-Augmented Generation (RAG)** architecture with **Google Gemini** and the **Qdrant vector database**.
- Implemented the end-to-end AI pipeline: **document ingestion, text extraction, chunking, embeddings, semantic search, context retrieval, prompt engineering, and streaming LLM responses** to the React UI.
- Designed a **scalable** Node.js/Express backend with REST APIs, separating the ingestion, retrieval, and generation layers.

COTE - REAL-TIME COLLABORATION PLATFORM

REACT, TYPESCRIPT, NODE.JS, EXPRESS, POSTGRESQL, SOCKET.IO

GitHub: github.com/SourabhRavi/cote-v2 | Live: cote.chitua.site

- Engineered and deployed a real-time collaboration platform with **persistent messaging, workspaces, channels, presence, and event-driven communication**.
- Designed **REST APIs**, session-based authentication, RBAC, workspace membership, invitations, and authorization using Node.js, Express, and PostgreSQL.
- Implemented **event-driven workflows** with Socket.IO for message, presence, channel, and multi-socket user events.

SKILLS

Generative AI: Generative AI, LLMs, RAG, Prompt Engineering, Embeddings, Vector Databases (Qdrant), Semantic Search, Agentic Workflows, Gemini, OpenAI, Claude, GitHub Copilot/Duo, Cursor, CodeRabbit

Frontend: React.js, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Angular

Backend: Node.js, Express.js, REST APIs, GraphQL, PostgreSQL, MongoDB, Qdrant, Socket.IO, Stripe, SSE

State & Architecture: Redux Toolkit, Zustand, React Query, RxJS, Context API, Micro Frontends, Scalable Architecture

Performance: Code Splitting, Lazy Loading, Memoization, Caching, Chrome DevTools

Testing & Security: Jest, React Testing Library, Unit Testing, JWT, OAuth, Secure Sessions

Tooling: Vite, Webpack, Git, GitHub, NPM, CI/CD (GitHub Actions), Agile/Scrum

EDUCATION

University of Engineering and Management, Kolkata

Kolkata, India | Jun 2016 – May 2020

B.TECH. IN ELECTRONICS AND COMMUNICATION ENGINEERING | CGPA: 7.95/10
