Sourabh Kumar Ravi
Software Engineer | React, TypeScript, GenAI | 4+ Years
sourabh.k.ravi@gmail.com | +91-7250465621 | linkedin.com/in/sourabh-k-ravi | Portfolio: sourabhravi.site | github.com/SourabhRavi

SUMMARY

Frontend Engineer with **4+ years of experience** building responsive, production-ready applications using **React, TypeScript, JavaScript (ES6+), HTML5, and CSS3**, with hands-on experience developing **Generative AI and RAG applications**. Skilled in translating designs into reusable, accessible interfaces and building end-to-end features with **Vite, TanStack Query, Redux Toolkit, Zustand**, REST APIs, and WebSockets. Built an AI-powered PDF knowledge assistant using **Google Gemini, embeddings, Qdrant vector search, and MongoDB**. Focused on performance, scalable UI architecture, testing, and reliable user experiences. Improved application load time by **40%**, optimized UI performance by up to **35%**, and contributed to a platform serving **15,000+ users**.

TECHNICAL SKILLS

Frontend Development: React.js, React Hooks, TypeScript, JavaScript (ES6+), HTML5, CSS3, responsive SPA development, reusable components, Next.js, Figma
UI Engineering: Pixel-accurate design implementation, component-based architecture, responsive layouts, accessibility fundamentals, cross-browser compatibility, performance optimization
Programming Paradigms: Object-Oriented Programming (OOP), functional programming, asynchronous JavaScript, ES6+ features
Build & Developer Tools: Vite, npm, Git, GitHub, browser DevTools, debugging, build configuration
State & UI Libraries: TanStack Query, Redux Toolkit, Zustand, RxJS, Material UI, Ant Design, Tailwind CSS
Testing & Engineering: Jest, React Testing Library, unit and integration testing, code reviews, Agile/Scrum
API Integration: REST, GraphQL, WebSocket, asynchronous data fetching, caching, API error handling, authentication flows
AI & GenAI: Generative AI, Retrieval-Augmented Generation (RAG), Google Gemini, Gemini Embeddings, LLM API integration, prompt-based workflows, streaming AI responses
Vector Search & Data: Qdrant, vector embeddings, semantic search, document extraction, text chunking, MongoDB

EXPERIENCE

IBM | Application Developer — Pune, India | Mar 2025 – Jul 2026

- Built production **React, Angular, and TypeScript** features for **Barclays' Risk & Finance Treasury platform**, translating complex requirements into reusable UI components, data-dense workflows, interactive grids, advanced filtering, and multi-step approval journeys.
- Integrated frontend modules with **REST APIs and backend microservices** in a modular/micro-frontend environment; collaborated with UX, product, backend, and QA teams to deliver end-to-end functionality.
- Improved application reliability through unit, integration, and end-to-end testing, code reviews, static analysis, CI/CD workflows, and browser-based debugging of rendering, functional, and performance issues.
- Applied reusable UI patterns and responsive layout practices to maintain consistent behavior across complex enterprise screens and data-heavy user workflows.

MOBIUX LABS | Software Engineer — Bengaluru, India | Aug 2023 – Jan 2025

- Built and shipped React purchase journeys and API-connected workflows for the **Wakefield Trinity ticketing platform**, serving **15,000+ users**; the work contributed to a reported **35% increase in sales**.
- Implemented responsive, design-accurate React interfaces using HTML, CSS, reusable components, and interactive UI patterns; partnered with product and design teams to translate mockups and requirements into production-ready screens.
- Re-architected **Terra.Do's LMS** around reusable React components and consistent UI patterns, improving maintainability and API integration while reducing load times by **40%**; validated changes with automated tests.
- Built **Aurbius Business Parks' facility-management UI** with Next.js, reusable components, **Material UI theming**, App Router, SSR, API Routes, and a backend-for-frontend layer; integrated **REST and GraphQL APIs** for data-heavy tables, filtering, bulk uploads, and multi-step approvals.
- Optimized data-heavy screens with reusable table and filtering patterns, clear loading/error states, and consistent interaction behavior across complex workflows.

ENVSAGE CLOUD SOLUTIONS | Frontend Engineer — Bengaluru, India | Jan 2023 – May 2023

- Built learning flows for **Edumentors UK's LMS**, contributing to a reported **60% increase in user satisfaction**; emphasized responsive layouts, semantic HTML, reusable accessible UI patterns, and clear interaction and feedback states.
- Delivered cross-platform UI for **NxtOrbit** with React, TypeScript, Ionic, and Capacitor, integrating REST APIs and managing application state with Redux Toolkit, Jotai, and Context API patterns.
- Built and enhanced experiences across **Bosch PMI, ClassTym, Kotak, and CoachPro**; shipped data-dense interfaces with advanced filtering, sorting, virtualized rows, custom renderers, bulk data flows, and persistent multi-step workflows.

PETPOOJA | Software Developer — Ahmedabad, India | Aug 2022 – Nov 2022

- Improved production **React.js** UI performance by **20%** through rendering and bundle-import optimizations; maintained automated tests and used browser DevTools and root-cause analysis to diagnose defects and improve reliability.

DEVX | Website Developer — Ahmedabad, India | Jun 2021 – Jun 2022

- Built and optimized a **React** coworking and facility-booking product with semantic, responsive UI and accessible interaction patterns; implemented reusable components, advanced search/filtering, persistent state, and API-connected booking flows, improving performance by **35%** and achieving **Google PageSpeed scores above 90**.

PROJECTS

COTE -- REAL-TIME COLLABORATION PLATFORM — React, TypeScript, Vite, TanStack Query, Zustand, Socket.IO

GitHub: github.com/SourabhRavi/cote-v2 | **Live:** cote.sourabhravi.site

- Built a responsive React SPA with real-time messaging, presence, and unread tracking using **TanStack Query** and **Socket.IO**.
- Developed Node.js/Express APIs with PostgreSQL and Prisma, implementing OAuth, role-based access, pagination, and request validation.

SKIM -- AI-POWERED PDF KNOWLEDGE ASSISTANT — React, TypeScript, Node.js, Express, Google Gemini, Qdrant, MongoDB

GitHub: github.com/SourabhRavi/rag-pdf-chat | **Live:** skim.sourabhravi.site

- Built a full-stack **RAG application** that lets users upload PDFs and ask questions, with conversation history and streamed AI-generated responses.
- Implemented document extraction and chunking, **Google Gemini embeddings**, semantic retrieval with **Qdrant**, and MongoDB persistence.

EDUCATION

University of Engineering and Management, Kolkata Kolkata, India | Jun 2016 – May 2020

B.Tech. in Electronics and Communication Engineering | CGPA: 7.95/10
