Sourabh Kumar Ravi
Front-End Engineer | React.js, Angular, TypeScript, Node.js | 4+ Years
sourabh.kumar.ravi.work@gmail.com | +91-8102438821 | linkedin.com/in/sourabh-k-ravi | github.com/SourabhRavi

SUMMARY

Front-End Software Engineer with **4+ years of experience** designing, developing, testing, launching, and optimizing production web and mobile applications using **JavaScript, TypeScript, React, Angular, HTML, and CSS**. Led frontend delivery for a ticketing platform serving **15,000+ users**, contributing to **35% sales growth**; reduced LMS load times by **40%** and improved UI performance by up to **35%**. Experienced in frontend architecture, reusable components, distributed API integration, asynchronous systems, production troubleshooting, automated testing, code reviews, and cross-functional delivery across enterprise banking and multiple client products. Applies computer science fundamentals, including object-oriented design, data structures, algorithmic problem-solving, and complexity trade-offs, to application architecture, pagination, and retrieval pipelines.

EXPERIENCE

IBM | Application Developer — Pune, India | Mar 2025 – Jul 2026

- Designed, developed, tested, and delivered production **React, Angular, and TypeScript** features for **Barclays' Risk & Finance Treasury platform**, translating business requirements into customer workflows with product, UX, QA, and backend partners through Agile delivery.
- Built reusable UI components and integrated frontend workflows with APIs and distributed backend services; handled asynchronous operations, changing data, validation, loading/error states, latency, and service failures while maintaining responsive, accessible, secure, cross-browser experiences.
- Investigated customer and production issues across UI/API boundaries using browser DevTools and root-cause analysis; delivered fixes and refactors, contributed to code reviews and automated testing, and improved application performance, reliability, and maintainability.

MOBIUX LABS | Software Engineer — Bengaluru, India | Aug 2023 – Jan 2025

- Led React frontend delivery for the **Wakefield Trinity ticketing platform**, serving **15,000+ users**; developed responsive, reusable React/Next.js and TypeScript ticket-purchase workflows that contributed to a reported **35% increase in sales**, while coordinating delivery and mentoring teammates.
- Re-architected **Terra.Do's Learning Management System** using **Angular**, reducing load times by **40%**; improved component reuse, frontend structure, rendering performance, and long-term maintainability.
- Developed responsive **Next.js and TypeScript** screens for the **Aurbius Business Parks Facility Management System**, supporting resource-tracking and maintenance workflows through reusable UI patterns and backend integration.
- Introduced **CodeRabbit**-assisted code reviews and shared Generative AI development practices with teammates, strengthening review consistency, knowledge sharing, and maintainable engineering practices.

ENVSAGE CLOUD SOLUTIONS | Frontend Engineer — Bengaluru, India | Jan 2023 – May 2023

- Revamped **Edumentors UK's Learning Management System** using **React.js**, contributing to a reported **60% increase in user satisfaction** through user-focused frontend improvements.
- Engineered cross-platform application features for **NxtOrbit** using **Ionic, Capacitor, React, and TypeScript**, addressing responsive behavior, usability, and performance across web and mobile environments.
- Implemented **Bosch PMI** features for plant-level **inventory placement of Bosch security systems**, translating placement-related operational requirements into frontend workflows while supporting system-change tracking and maintenance records.
- Delivered frontend features across **ClassTym, Kotak, and CoachPro**, building React/Next.js web and mobile interfaces for distinct client requirements and workflows; adapted reusable implementation patterns across multiple product engagements.

PETPOOJA | Software Developer — Ahmedabad, India | Aug 2022 – Nov 2022

- Improved production **React.js** performance by **20%** through rendering optimization and efficient bundle imports, reducing load times and improving application responsiveness.
- Investigated and resolved high-priority production UI defects through browser debugging and root-cause analysis, minimizing disruption to business operations.
- Designed and deployed UI/UX improvements that contributed to a reported **15% increase in user retention**.

DEVX | Website Developer — Ahmedabad, India | Jun 2021 – Jun 2022

- Rebuilt and optimized a production **React.js** coworking and facility-booking platform, improving overall performance by **35%** through frontend optimization and responsive UI improvements.
- Improved WordPress blog performance to **Google PageSpeed scores above 90**; optimized ad-revenue pages during the GhostJS-to-Bootstrap transition, raising desktop scores from **55 to 98** and mobile scores from **20 to 75**.

PROJECTS

COTE -- REAL-TIME COLLABORATION PLATFORM — React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Socket.IO

GitHub: github.com/SourabhRavi/cote-v2 | **Live:** cote.chitua.site

- Built and deployed a real-time collaboration platform with workspaces, channels, persistent messaging, presence, typing indicators, and unread-message tracking using **Socket.IO**.
- Designed modular **Node.js/Express** and PostgreSQL services with Prisma, Google OAuth, secure sessions, role-based access control, and membership authorization; modelled workspace, channel, and membership relationships using clear data boundaries.
- Implemented **cursor-based pagination** and event-driven synchronization with TanStack Query; applied data-structure and algorithmic reasoning to message retrieval, considering query complexity, response latency, and scalability as message histories grow.

SKIM -- GENAI-POWERED PDF KNOWLEDGE ASSISTANT — React, TypeScript, Node.js, Express, Gemini, Qdrant, MongoDB

GitHub: github.com/SourabhRavi/rag-pdf-chat | **Live:** skim.chitua.site

- Built a full-stack **RAG application** for browser-based PDF uploads, document-grounded question-answering, conversation history, and streaming responses using Google Gemini and Qdrant.
- Implemented PDF text extraction, chunking with overlap, embedding generation, vector indexing, and semantic retrieval; considered chunk-size, context relevance, and retrieval-latency trade-offs when designing the pipeline.
- Developed modular **Node.js/Express** APIs with MongoDB persistence, Zod request validation, and rate limiting, separating document ingestion, retrieval, and chat workflows into maintainable modules.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Angular, Next.js, HTML5, CSS3, responsive design, accessibility, semantic HTML, cross-browser compatibility, reusable UI components, frontend frameworks and patterns

Computer Science & Architecture: Object-oriented design (OOD), data structures, algorithm design, problem-solving, complexity analysis, time/space trade-offs, frontend architecture, modular design, extensibility, maintainability

APIs & Asynchronous Systems: Node.js, Express.js, REST APIs, GraphQL, distributed backend integration, asynchronous operations, latency and failure handling, changing data, loading/error states, TanStack Query, Redux Toolkit, Zustand, RxJS, Socket.IO, SSE, cursor-based pagination

Testing & Operational Quality: Jest, React Testing Library, unit and automated testing, code reviews, production troubleshooting, debugging, root-cause analysis, observability, performance monitoring, secure UI patterns, operational excellence, continuous improvement

Data & Developer Tooling: PostgreSQL, MongoDB, Prisma, Qdrant, OAuth, JWT, RBAC, Git (branching, commits, merges, conflict resolution, repository collaboration), GitHub, GitLab, CLI workflows, npm, Vite, Webpack, GitHub Actions, Agile/Scrum

Performance & Cross-Platform: Core Web Vitals, Google PageSpeed, code splitting, lazy loading, rendering optimization, memoization, Ionic, Capacitor, cross-platform application development

Engineering Practices: End-to-end feature ownership, cross-functional collaboration, client and stakeholder coordination, mentoring, engineering best practices, scalable workflows, continuous improvement

EDUCATION

University of Engineering and Management, Kolkata — Kolkata, India | Jun 2016 – May 2020

B.Tech. in Electronics and Communication Engineering | CGPA: 7.95/10
