SUMMARY

Front-End Software Engineer with **4+ years of experience** designing, building, testing, launching, and improving production web and mobile applications using **JavaScript, TypeScript, React, Angular, Vue.js, HTML, and CSS**. Delivered a React ticketing platform serving **15,000+ users**, contributed to **35% sales growth**, reduced LMS load times by **40%**, and improved UI performance by up to **35%**. Experienced in end-to-end feature ownership, reusable component architecture, API and distributed-service integration, asynchronous failure handling, accessible and responsive interfaces, production debugging, automated testing, and Agile collaboration.

EXPERIENCE

IBM | Application Developer — Pune, India | Mar 2025 – Jul 2026

- Delivered production **React, Angular, and TypeScript** features for **Barclays' Risk & Finance Treasury platform**, translating business requirements into frontend workflows with product, UX, QA, and backend partners in Agile sprints.
- Built reusable UI components and API-integrated journeys; handled asynchronous data, changing responses, latency, validation, loading/error states, and service failures while maintaining responsive, accessible, secure, cross-browser experiences.
- Investigated customer and production issues across UI/API boundaries using browser DevTools and root-cause analysis; implemented fixes and refactors and contributed to code reviews, automated tests, and ongoing quality and performance improvements.

MOBIUX LABS | Software Engineer — Bengaluru, India | Aug 2023 – Jan 2025

- Led React frontend delivery for the **Wakefield Trinity ticketing platform** serving **15,000+ users**, building responsive, reusable ticket-purchase workflows that contributed to a reported **35% increase in sales**.
- Re-architected **Terra.Do's Learning Management System**, reducing load times by **40%**; built reusable React components and hooks, integrated backend APIs, and optimized rendering and maintainability.
- Developed responsive **Next.js** screens for the **Aurbius Business Parks Facility Management System**; introduced **CodeRabbit**-assisted reviews and shared engineering practices with teammates to strengthen quality and adoption.

ENVSAGE CLOUD SOLUTIONS | Frontend Engineer — Bengaluru, India | Jan 2023 – May 2023

- Revamped **Edumentors UK's LMS** with **Vue.js**, contributing to a reported **60% increase in user satisfaction** through user-focused frontend improvements.
- Engineered cross-platform features for **NxtOrbit** using **Ionic, Capacitor, React, and TypeScript**; implemented **Vue.js** features for the **Bosch PMI app** to track changes and record maintenance activity in facility security systems.
- Designed web and mobile screens for **ClassTym** using **React, Next.js, and TypeScript**; contributed key features to **Kotak** and **CoachPro** fitness mobile apps using React/Next.js, emphasizing usability and scalable user experiences.

PETPOOJA | Software Developer — Ahmedabad, India | Aug 2022 – Nov 2022

- Improved production **React.js** performance by **20%** through rendering optimization and efficient bundle imports; resolved high-priority UI defects using browser debugging and root-cause analysis.

DEVX | Website Developer — Ahmedabad, India | Jun 2021 – Jun 2022

- Rebuilt and optimized a production **React** coworking platform, improving performance by **35%** and achieving **Google PageSpeed scores above 90**; improved responsive behavior and page performance.

PROJECTS

COTE -- REAL-TIME COLLABORATION PLATFORM — React, TypeScript, Node.js, Express, PostgreSQL, Prisma, Socket.IO

GitHub: github.com/SourabhRavi/cote-v2 | **Live:** cote.chitua.site

- Built and deployed a collaboration platform with workspaces, channels, persistent messaging, real-time presence, typing indicators, and unread-message tracking using **Socket.IO**.
- Designed Express/PostgreSQL services with Prisma, Google OAuth, secure sessions, RBAC, and membership authorization; implemented cursor-based pagination and event-driven UI synchronization with TanStack Query.

SKIM -- GENAI-POWERED PDF KNOWLEDGE ASSISTANT — React, TypeScript, Node.js, Express, Gemini, Qdrant, MongoDB

GitHub: github.com/SourabhRavi/rag-pdf-chat | **Live:** skim.chitua.site

- Built a React/TypeScript PDF assistant with browser uploads, document-grounded answers, conversation history, and streaming responses using Gemini and Qdrant.
- Implemented PDF extraction, chunking, embeddings, vector indexing, and semantic retrieval; developed Express APIs with MongoDB persistence, Zod validation, and rate limiting.

SKILLS

Frontend: JavaScript (ES6+), TypeScript, React.js, Angular, Vue.js, Next.js, HTML5, CSS3, responsive UI, accessibility, semantic HTML, cross-browser compatibility, reusable components and patterns

Computer Science & Architecture: Object-oriented design, data structures, algorithm design, problem solving, complexity analysis, frontend architecture, extensible and maintainable code

APIs & Asynchronous UI: Node.js, Express.js, REST APIs, distributed backend services, TanStack Query, Redux Toolkit, Zustand, RxJS, asynchronous operations, latency/failure handling, changing data, Socket.IO, SSE, cursor pagination

Testing & Operational Quality: Jest, React Testing Library, unit and automated testing, code reviews, root-cause analysis, production debugging, observability, Chrome DevTools, performance monitoring, secure UI patterns

Data & Developer Tooling: PostgreSQL, MongoDB, Prisma, OAuth, JWT, RBAC, Git (branching, commits, merges, conflict resolution, repository collaboration), GitHub, CLI workflows, npm, Vite, Webpack, GitHub Actions, Agile/Scrum

Performance & Cross-Platform: Core Web Vitals, Google PageSpeed, code splitting, lazy loading, rendering optimization, memoization, Ionic, Capacitor, cross-platform app development

EDUCATION

University of Engineering and Management, Kolkata — Kolkata, India | Jun 2016 – May 2020

B.Tech. in Electronics and Communication Engineering | CGPA: 7.95/10
